PRODUCT INFO

Mara® *Jet* DI-MS Silver

Marabu

Sparkle your Life with Mara® *Jet* DI-MS Silver

Lift Digital Printing to a new level with Mara® *Jet* DI-MS Silver! Hundreds of different metallic shades can be created in combination with standard CMYK inks. Stand out from the crowd and enjoy the attention!

Applications

Mara® *Jet* DI-MS Silver is excellently suited for printers employing EPSON® DX5 print head technology such as Mimaki JV33/JV34, and CJV-30.

The silver is suited for non-absorbing, smooth substrates like:

- Monomer PVC self-adhesive foils
- Polyester films
- Coated banner and tarpaulin materials
- Papers and fabrics

Thanks to the high-quality pigmentation, a high metallic gloss is achieved at regular print modes.

Using the RIP Software Spot Colour configuration for Mimaki JV3 allows you to use the white channel for the silver to upgrade your next prints with metallic effects.

For further information please refer to the Technical Data Sheet on www.marabu-inks.com

Your Benefits:

Hundreds of Metallic Effects

→ Silver-, Gold-, Bronze, or other effects can easily be reproduced with Color Logic

Excellent compatibility with newest printer technology

→ Fully compatible with original parts
→ Ink change-over without prior flushing

Outstanding printing stability

→ Fast production speeds for highest efficiency

Available in different units

→ Full flexibility for differing ink consumptions

High-grade Pigmentation

→ For excellent crisp and brilliant silver effects
