

Pantone® Formula Guide with 224 new shades

The PANTONE® Formula Guide is the world's most frequently used colour matching tool. Following the changes of recent years, PANTONE® is now once again expanding the colour spectrum of the PANTONE® FORMULA GUIDE by 224 new shades.

For graphic designers, the printing industry, and many other sectors, the PANTONE® Formula Guide is the ultimate fan deck for colour reproduction. With 2161 colours, it is already one of the most comprehensive colour collections.

The existing colour selection has now been expanded to include 224 new, market-driven hues, plus 5 new base colours to add even more vibrance to the PANTONE® Colour Guide. Current and upcoming colour trends have been taken into account; more dark, neutral colours have been added.

This gives you a new total of 2390 hues to choose from for any design project you may have in mind.

The new PANTONE® Formula Guide with Marabu design includes one fan deck printed on coated paper, and one fan deck printed on uncoated paper.
